Potential Fisheries Fund of Inland Freshwaters, thousand hectares

> 4000 fish farms – 15900 tons

pond fishery – 92%

RAS – 0.005%

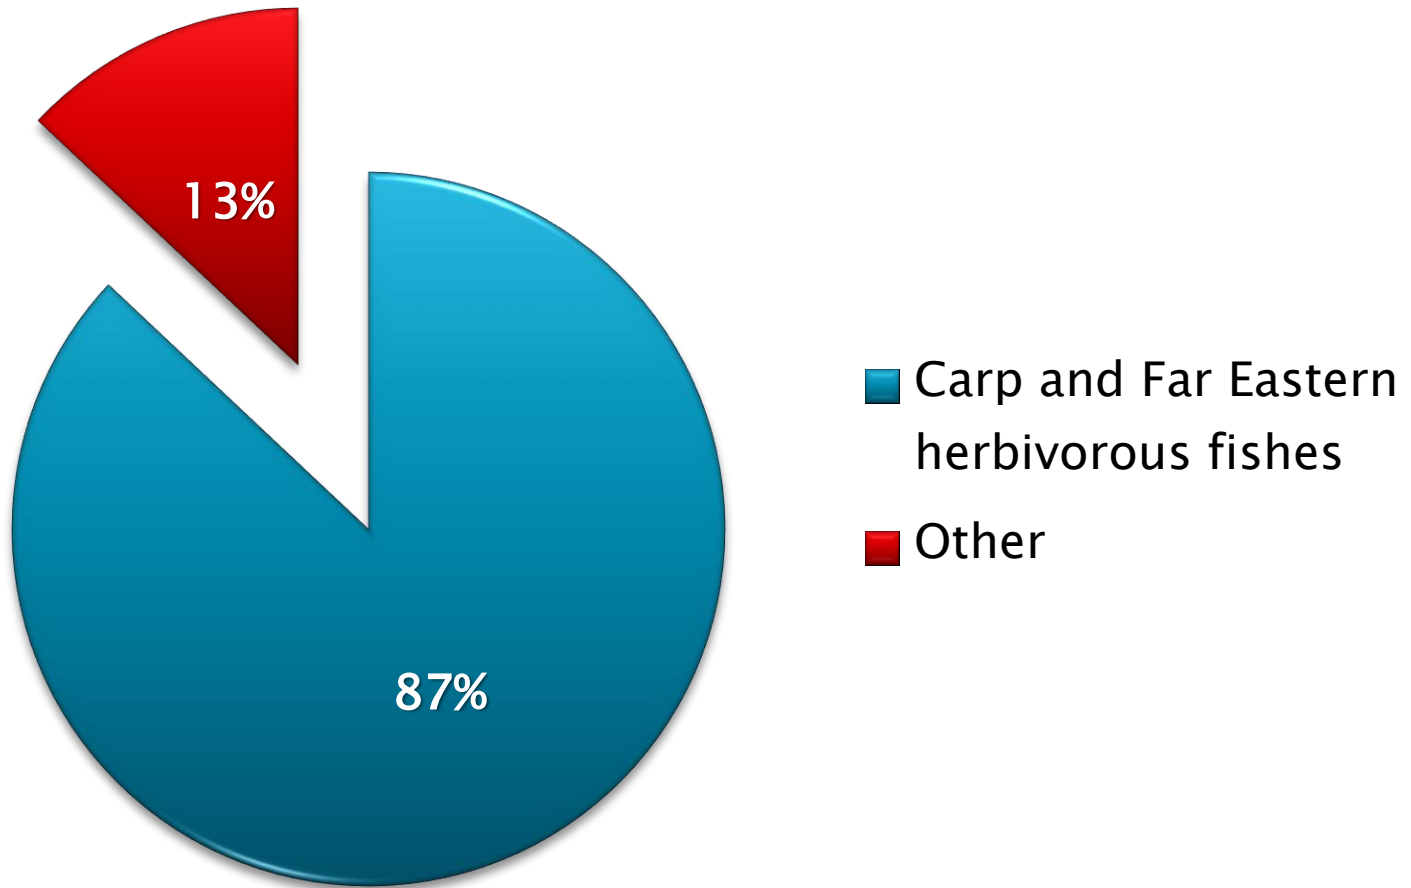

cage aquaculture – 0.003%

other ~ 8%

aquaculture productions

Governing the aquaculture sector in Ukraine

Law of Ukraine
“About Aquaculture”

September 18, 2012,
№5293–VI

the State Agency
for Fisheries

What is needed to start activities in pond aquaculture?

land lease agreement or
state certificate of property

- Territorial Authorities

water body standard lease
agreement

- Territorial Authorities

lease contract for hydraulic
structures

- State Property Fund of Ukraine and
State Fisheries Agency of Ukraine

permit for special water
use

- Territorial Authorities of State Water
Management Agency

report on environmental
impact assessment

- Department of Ecology of the Regional
State Administration

water body passport

- revision every 5 years
- only 5 organizations have the right to develop

scientific and biological substantiation

- the breeding and cultivating of alien and non-local species of hydrobionts

What is needed to start activities in RAS?

land lease agreement or
state certificate of property

- Territorial Authorities

permit for special water
use

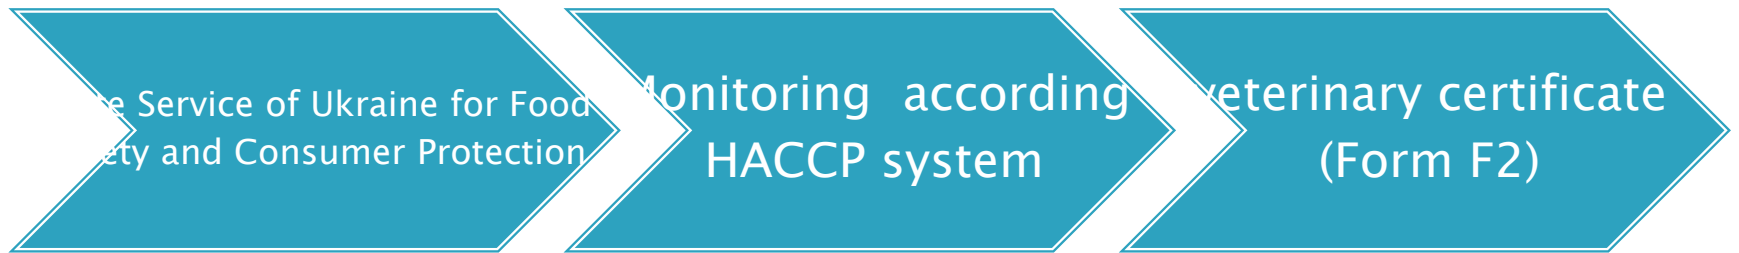

- Territorial Authorities of State Water Management Agency

report on environmental
impact assessment

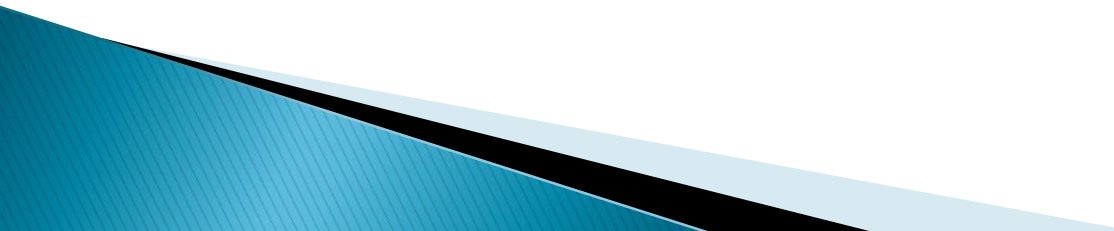

- Department of Ecology of the Regional State Administration

scientific and biological
substantiation

- the breeding and cultivating of alien and non-local species of hydrobionts

CONCLUSIONS:

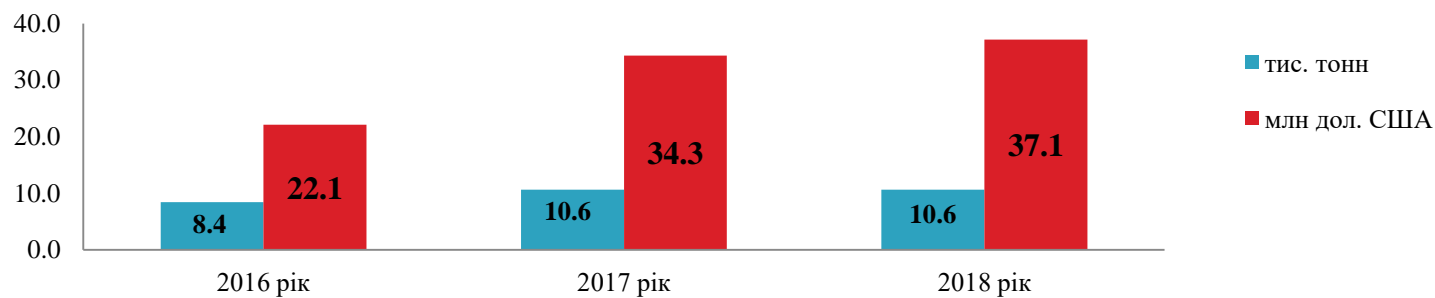

- ▶ the degree of regulation of aquaculture activities in Ukraine can not be called high;
 - ▶ The main reasons for the low level of development are:
 - the pressure of imported products,
 - the high cost of feed,
 - the use of outdated technologies.
- 

Thank you for attention!
